ABOUT BIANCO

REINFORCING STEEL, MADE TO ORDER

Bianco Reinforcing is one of South Australia's largest manufacturers of steel reinforcing for the building, civil and construction industries. We're family owned and have run our Gepps Cross plant since 1999, about 6 km north of the Adelaide CBD.

Our estimators and schedulers handle any job, from house footings to multi-storey buildings. We make our own mesh, including non-standard sizes made to order, and process bar, ligatures and mesh to suit every project.

SECTION 01

REBAR

Australian-certified reinforcing bar for durability and structural integrity in any concrete application.

Deformed rebar

Australian-certified bars in multiple stock lengths and thicknesses, usually supplied in 6 and 12 metre lengths, with diameters from 10mm to 40mm. Grade N. Supplied straight or cut and bent to your schedule.

- Slabs, beams, columns and cages
- Stock lengths or cut to schedule
- Galvanised on request

DEFORMED BAR SIZES

BAR	DIAMETER	STOCK LENGTHS	GRADE
N10	10 mm	6 m · 12 m	N
N12	12 mm	6 m · 12 m	N
N16	16 mm	6 m · 12 m	N
N20	20 mm	6 m · 12 m	N
N24	24 mm	6 m · 12 m	N
N28	28 mm	6 m · 12 m	N
N32	32 mm	6 m · 12 m	N
N36	36 mm	6 m · 12 m	N
N40	40 mm	6 m · 12 m	N

ROUND BAR SIZES

BAR	DIAMETER	LENGTH	GRADE
R12	12 mm	6 m	N250
R16	16 mm	6 m	N250
R20	20 mm	6 m	N250
R24	24 mm	6 m	N250

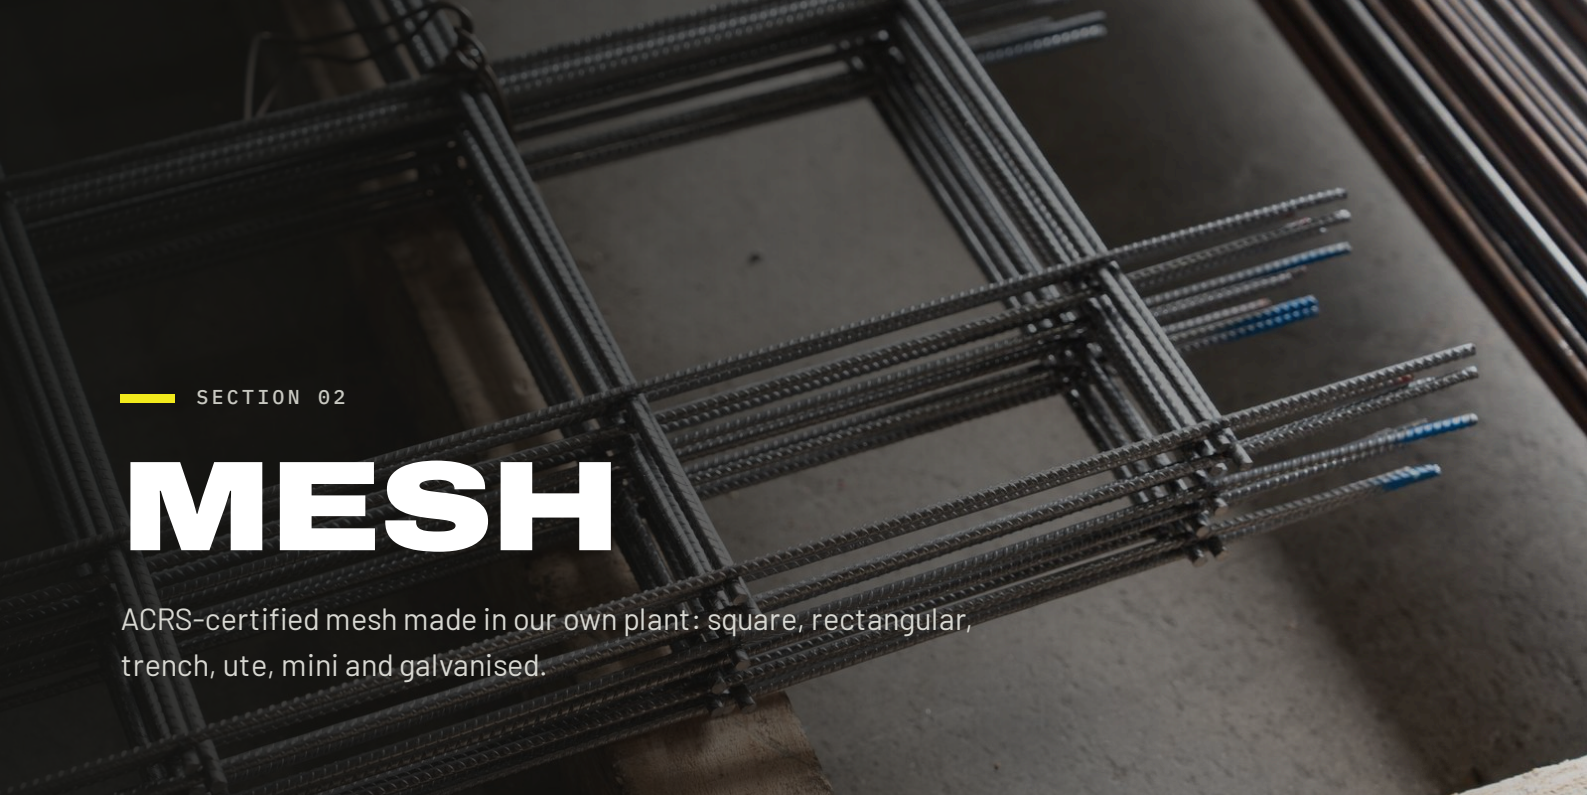
Round rebar

Our round rebar is N250 grade reinforcing bar.

Galvanised rebar

Galvanised rebar is coated with a protective layer of zinc that stops the bar from corroding. The coating keeps it resilient against natural elements and chemical corrosion, for reliable, long-lasting reinforcement.

- Zinc-coated for corrosion protection
- Suits exposed and coastal conditions
- Available cut and bent to schedule



SECTION 02

MESH

ACRS-certified mesh made in our own plant: square, rectangular, trench, ute, mini and galvanised.

Choose from our stock sizes or a custom-cut option to fit your requirements. We manufacture mesh in non-standard sizes to order. All mesh can be galvanised on request.

STOCK MESH SHEETS: SQUARE AND RECTANGULAR

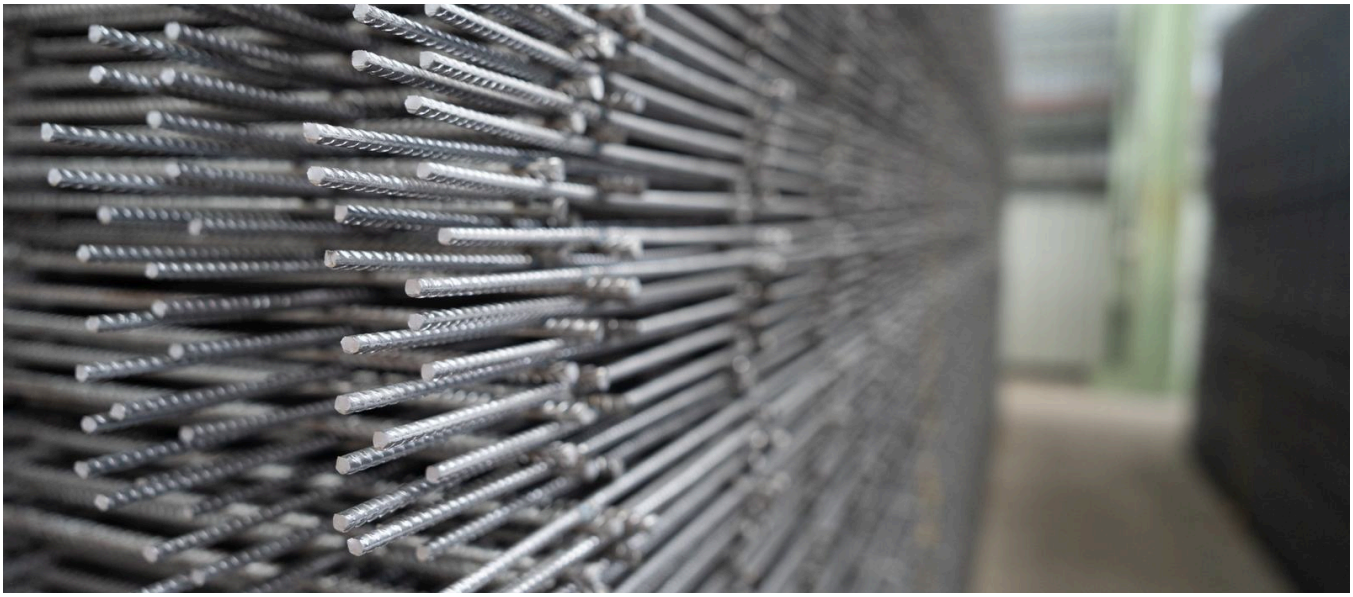
SHEET	LENGTH	WIDTH
Full sheet	6 m	2.4 m

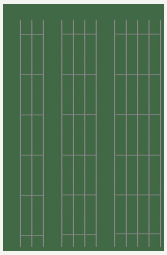
Ribbed square mesh

Reinforces concrete in walls, precast panels, house slabs and driveway slabs, adding structural support, strength, durability and load-bearing capacity.

Ribbed rectangular mesh

Designed for projects that need extra tension stability to get the most out of the concrete's strength.



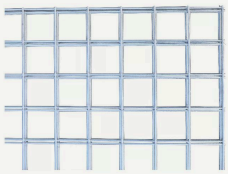


Trench mesh

Reinforces concrete in narrow, linear footings and beams for residential and commercial foundations, adding strength and stability. Class L.

Ute mesh

Ribbed square mesh sized for easy, legal transport on a ute or small truck without overhang. Suits smaller jobs and narrow access.



Galvanised mesh

Any of our mesh can be galvanised on request for added corrosion protection.

MADE IN GEPPS CROSS

We make our own mesh

We manufacture mesh on site from coil, under ACRS certification, with our own quality testing on every run. That means shorter lead times and steel you can trace.

SECTION 03

ACCESSORIES

Concrete projects need a range of accessories, from mesh and bar chairs to spacers, bar guards and tie wire. Here are some of the many we stock.

Concrete blocks

Concrete blocks with wire

Tie wire

Wire bar chairs (Mesh Mate ferrule tip)

Poly plastic sheeting

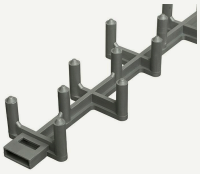
Combination bar chair

Clip-on bar chair

Circular chair

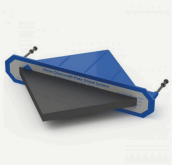
Base plate

Cradles



Deck rail chair

Dowels



Diamond dowels

Expansion joints

Dowel sleeve

Poly building tape

Rod ties

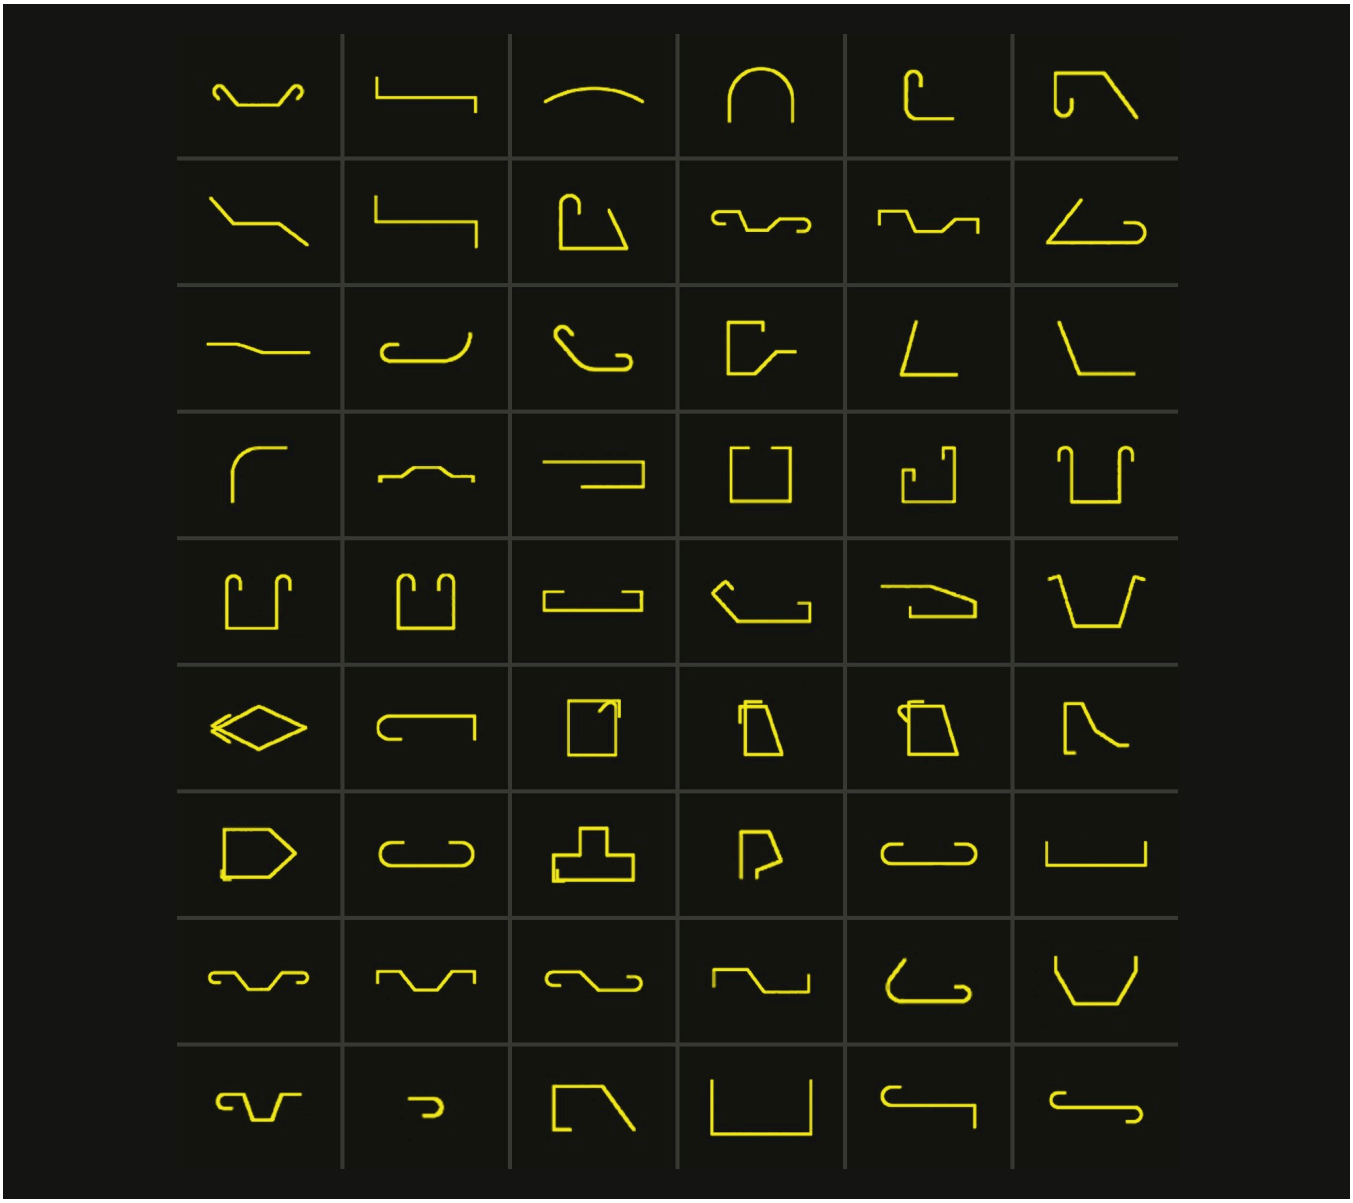
Bar caps

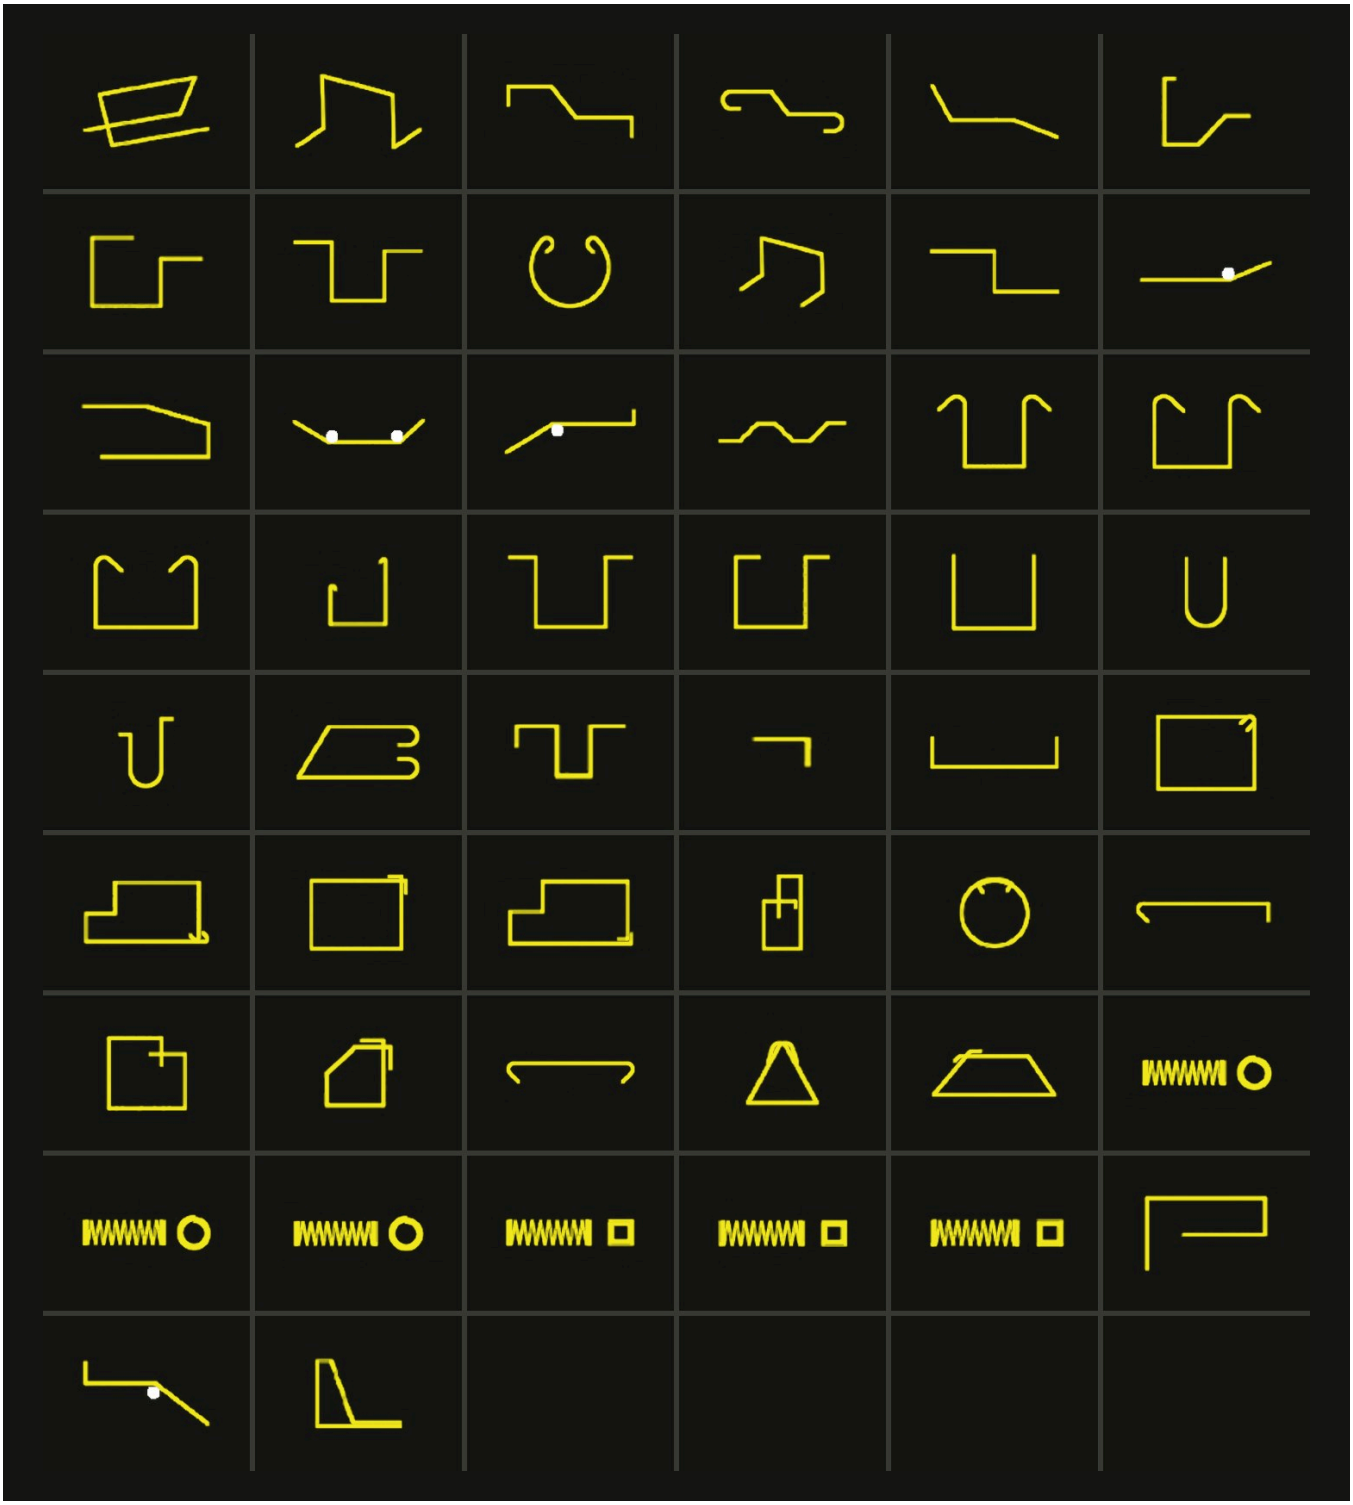
We offer a much wider range than shown here. Can't see what you need? Call (08) 8360 1111 and our team will help you choose the right products.

SECTION 04

CUT & BEND SHAPE GUIDE

Depending on the project, our team provides tailored cut and bend rebar solutions. Using modern equipment and precise processes, we make sure each piece meets the specifications required for structural integrity.





Don't see your shape? Send us the drawing and we'll tell you what's possible.

SECTION 05

FROM DRAWINGS TO DELIVERY

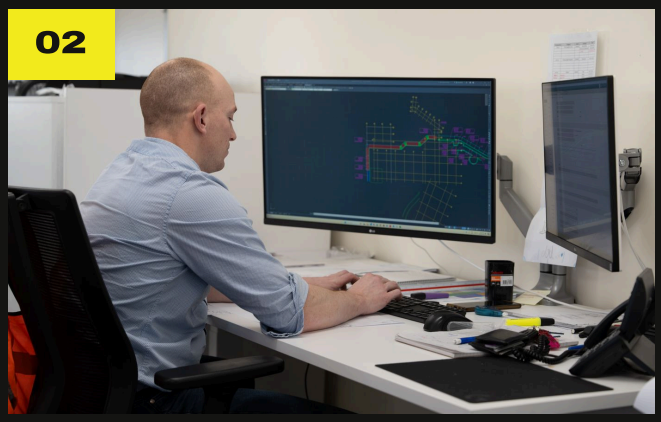
One team handles the whole job. Send us your plans and our estimators, schedulers, processing crews and drivers take it from there.

01

Quote

Our estimators read your structural drawings and price the steel your project needs.

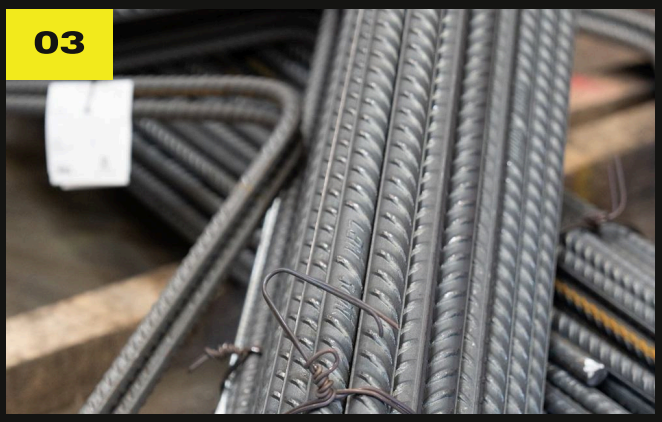
02



Schedule

Schedulers turn the drawings into a bar-by-bar list of every size, shape and length.

03



Cut & bend

We process your order at our Gepps Cross plant, labelled and bundled for site.

04

Delivery

Our own crane trucks deliver to site, with next-day delivery available on many orders.*

*Next-day delivery is subject to conditions. Collection from our Gepps Cross facility is also available.
